! WARNING

Prevent any misuse! Long cord, risk of injury due to strangulation. Small parts that could be swallowed; packaging contains small parts for installing the product. Any surplus small parts must be stored out of reach of children after installation. Do not put babies in the product – danger of suffocation from pillow. Product does not contain a safety belt – small children could fall out. After installation, knot the rope on the LA SIESTA SmartSwivel and cut off any surplus. Do not twist the suspension. Products must not be hung directly in the LA SIESTA MultiSpot. Risk of injury due to material breakage. Only one rope may be attached to each LA SIESTA MultiSpot. Prevent the suspension from coming into contact with sharp edges. The LA SIESTA MultiSpot must only be attached to load-bearing surfaces such as concrete or strong wooden beams and is not suitable for attachment to trees. The requirements for screws and dowels vary widely depending upon the nature of the load-bearing material. The supplied screws and dowels are high-quality universal solutions, but are not suitable for all applications. Therefore, the supplied screws and dowels should only be used if you can expertly establish their suitability for the material at the installation location. If you are not sure about the nature of your surface, contact a specialist and seek advice on suitable screws and dowels. The specified maximum carrying capacity refers exclusively to the delivered components and may be significantly reduced if the carrier material is not in a suitable condition, if unsuitable screws and dowels

are used, or in the event of improper installation. Can only be used on thinner wooden constructions after carrying out an expert inspection to establish whether installation can be carried out. Drilling dust must be cleared from drill holes. The supplied dowels must not be used when installing in wood. Always dismantle product and ropes when not in use. This product for children is not a swing or sports, gymnastics or climbing equipment. Only use the suspension system for this product. Only use for sitting. Do not stand in the product. Risk of injury due to falling or material damage. Children may only use this product under constant adult supervision.

! CAUTION

Do not exceed the maximum carrying capacity of the product (see last page), as this will result in damage. If the product is damaged, stop using it and dispose of it appropriately. When choosing a location, keep walkways clear; select or create soft ground and keep sufficient distance from potential obstacles near and under the product to avoid collisions and injuries. Do not stand or play below or within the swinging range of the product. Do not lay the product on or attach the product above rough or sharp-edged surfaces. Do not place heavy or pointed objects in the product. Do not use near heat sources or flames. Do not smoke in or near the product. Do not use while wearing jewelry, shoes, clothes with hook and loop fasteners or similar. Keep pets away from the product.

Only allow the product to be used if you have read and understood these operating instructions and have informed children about the possible risks. The wall or ceiling attach-
